PROJECTS

LinkedIn HRIT (07/2023 - Present)

- Maintaining home grown applications which built using ReactJS, Angular, NodeJS and template language. Using Azure services for hosting application, SCM, database. All these applications are used by HR team for smooth onboarding of candidates.
- Supporting SaaS applications like SmartRecruiters and also leading the team of four members. Connect with vendor on weekly basis for discussing the issues with applications.

WPR Cisco (11/2022 - 05/2023)

- Developed and maintained multiple cisco internal applications using a variety of front-end technologies, including React, Angular, and JSP pages.
- Improved page loading times by implementing infinite scrolling, enhancing user experience.
- Successfully resolved a Chrome-specific issue related to floorplan printing, eliminating extra blank pages.
- Addressed minor bugs and implemented various small components to ensure a polished and bug-free user experience.

Good Lives Website (05/2021 - 07/2021) [🔗](#)

- Led the development of the GoodLives website from inception, using the MERN (MongoDB, Express, React, Node.js) stack.
- Implemented a robust authentication system, allowing users to register and log in using email and password credentials, as well as integrating Google Sign-In for a seamless and secure login experience.
- Leveraged the Google Calendar API to enable users to book therapy appointments conveniently through the website, enhancing user accessibility and engagement.
